

HIGH PERFORMANCE 60" AFRV EXHAUST FAN

The 60" AFRV High-Performance Exhaust Fan delivers powerful airflow and efficiency in a mid-size footprint, making it the ideal solution for dairy barns with limited sidewall height. Designed to maximize ventilation where larger fans or double stacking aren't feasible, this fan completes the GenV lineup with a versatile, high-output option.

Engineered with an innovative octagon cone, the AFRV 60" optimizes space while maintaining superior airflow performance. Its design allows for easier shipping, streamlined installation, and efficient assembly—helping operations get up and running quickly.

With multiple motor options ranging from 2–4 HP, this fan provides the flexibility to match performance needs while maintaining energy efficiency. Built for durability and long-term reliability, the AFRV 60" ensures consistent performance in demanding dairy environments.

Leading Technology

- High-Efficiency Motor Options (2–4 HP)
- Fluid Dynamic Blade Design
- Octagon Cone for Maximum Airflow Efficiency

Easy Installation & Operation

- Compact Design for Low Sidewall Applications
- Easy-to-Ship, Modular Components
- Fast Assembly and Serviceability

Optimized Performance

- High Airflow Output in a Mid-Size Fan
- Space-Saving Octagon Cone Design
- Completes Full GenV Ventilation Lineup

Ready to maximize airflow where space is limited?

Upgrade your barn with the new AFRV 60" Exhaust Fan and experience high-performance ventilation designed to fit where others can't. Contact your dealer today to learn more.
